

12.8V LiFePO4 Battery

12.8V200Ah

The battery is a lead to lithium battery pack which consists of long span LiFePO4 battery cells and functional BMS. It can customize different voltage capacities according to customer needs, and can form a system according to needs to meet power demand. It is mainly used to replace lead-acid batteries.

Product Function

Diverse scenarios

Used for solar street lighting, emergency lighting, electric wheelchairs and for powering laptops, refrigerators, TVs etc. by connecting to a sine wave inverter

Precision construction

Precision moulds are used, taking full account of the safety and durability of the product's internal structure, with a waterproof rating of up to IP54

Functional extensions

Supports series and parallel use and optional Bluetooth communication to meet differentiated needs

After sales service

A 5-year long warranty, additional spare parts and overseas warehouses in several locations guarantee a worry-free after-sales service

Product Application

UPS

EPS

Solar Power

Electric Vehicle

Others

Specifications

Electrical Characteristics	Nominal Voltage (V)	12.8
	Nominal Capacity (Ah)	200
	Nominal Energy (Wh)	2560
	Cycle Life	2000
	BMS	200A
Standard Charge	Charge Voltage (V)	14.6
	Charge Profile (A)	CC-CV
	Charge Current (A)	100
	Maximum Charge Current (A)	200
Standard Discharge	Continuous Current (A)	100
	Max Continuous Current (A)	200
	Max Pulse Current (A)	400
	Cut-Off Voltage (V)	8
Environmental	Charge Temperature	0°C~55°C
	Discharge Temperature	-20°C~60°C
	Storage Temperature	-30°C~60°C
Mechanical	Material System	LiFePO4
	Case Material	ABS
	L (mm) × W (mm) × H (mm)	522*240*218
	Weight	20KG
	Terminal	M8
Warranty		5 years
